

A single child born in Brežice to the mother Vera Zupančič (passed away in 1980), professor of Slovene language, Slavic Studies, classical languages at the College of Education in Maribor, and to the father, the JLA Air Force Colonel (passed away in 1984).

More than 35-year devotion for professionalism.

Slobodan Vujasinovič, doctor of medicine, ranks among the most prominent specialists in skin and venereal disorders in the region, and has gained years-long experiences as well as a wealth of knowledge. He graduated from Faculty of Medicine in Zagreb in 1980 and passed the professional examinations with merit in Ljubljana two years later.

He started his professional career as a general practitioner in Celje General Hospital, in Radeče (3-year position of a Deputy Director), in Rimske Toplice, and in Laško prior to the specialization in Zagreb Clinic for Skin and Venereal Disorders (under doctor Aleksey Kasky's mentorship), where later Vujasinovič was employed for another 7 years (till 1992). One of his achievements of the highest pride is undoubtedly taking part in the haematological team specialised in bone marrow transplantation in Zagreb (Boris Labar, Prof.) as well as an independent management of practice of venereal diseases and AIDS also in Zagreb.

In collaboration with his professors E. Cividini-Stranič and Aleksej Kasky, Vujasinovič established the first practice of psychosomatic dermato-venerology as well as the first practice of scalp diseases in former Yugoslavia.

In the period of time of compulsory military service Vujasinovič graduated from Sanitary Officers Training School and served as a sanitary doctor in Military Urgency Service for the city of Belgrade.

He has been constantly upgrading his wealth knowledge of clinical spectrum internationally – studies in Paris, Vienna, Munich, the Netherlands (especially in the field of psycho-dermatology), Australia, Canada, the USA, Brazil, in dermatological spa in Germany, Israel, and at the Dead Sea. His passion for incessant educating well reflects in his extraordinary achievements, i.e. post-university graduation in Subtype of Psycho-Therapy (logo-therapy according to Viktor E. Frankl, Dr) in 2016.

As the representative of Slovenia, Vujasinovič took an active part (lecturing) in the 4th International Congress of Logo-Therapy in Moscow in 2018.

Without any doubt, his psycho-somatic approach to skins diseases treatment, which development began in 1985, is worth being laid great stress. His affection for this method is well reflected also in his taking part in the process of young people's education as a lecturer of expert subjects at Secondary Medical School in Celje as well as in his prophylactic lectures on holistic approach to a patient held in Slovenia wide.

In addition, Vujasinovič was engaged as an official sports physician in KK Pivovarna Laško (basketball team) for more than a decade. Namely, Vujasinovič himself was an active basketball player at KK "Medveščak" and KK "Zaprude" in Zagreb during attending both grammar school and university for about ten years.

His passion for basketball is descended from the childhood spent in the wonderful city of Zadar, Croatia.

Until 2016 he was also a forensic expert for Dermato-venerology.

Vujasinovič used to run his own practice in Zdravilišče Laško (Laško Thermal Spa) without being given a concession for about 20 years.

"I may call this a real lesson of profession. When being unable to solve the problem, the patient will no more knock on our door." is what he relates to young physicians.

Vujasinovič is also a member of numerous professional associations - The Association of Slovene Dermato-Venerologists, The Association of Slovene Sports Physicians, and The International Association of Dermato-Surgery (ISDS) with its headquarters in Chicago (USA), just to mention some of them. Currently, he is also the member of Slovene Association "Logos" Council of Experts, and holds lectures on the employment of logo-therapy in psycho-somatic medicine as the part of contemporary curriculum of Logo-Therapy Studies in Ljubljana (Chancellor of University Jože Ramovs, Dr. Prof.). Vujasinovič has published numerous expert articles, cooperated in creating textbooks, and written more than 50 prophylactic articles aimed to non-expert public.

In recent 5 years he has taken an active part in almost all congresses of dermato-venerology and logo-therapy in Slovenia.

Vujasinovič's wide experiences and professionalism make him get focused onto the wholesome treatment of his patients, supported by the latest and the most effective medical treatment.

His young colleagues are all given much respect by him. The nurse Karin plays the role of his left and right self also as a therapist, her valour and devotion to her work make him be proud off a lot.

Their seven-year-long cooperation has already crowned with work success ever following their two lodestars:

"WHOEVER SAVES ONE LIFE SAVES THE WORLD ENTIRE."

"MAN MAY LEARN AND MATURE UNTIL HIS DEATH, HOWEVER THE MAJORITY OF MANKIND MAKES A DECISION SIMPLY JUST TO GROW OLDER."
